

## **Construction Connection – Week of Jan 30, 2017**

For more details on work planned over the next few weeks, please contact [jflick@bayviewseattle](mailto:jflick@bayviewseattle) to read the notes from the Jan. 25th Andersen Construction update meeting.

**Level 1 / First Floor (west):** Rebuild continues with more sheet rock and mudding. Air ventilation will be in effect for odor control.

### **Level 2 (ALU):**

- Work will continue on in the south central area and north east corner.

### **Levels 3-9:**

- Framing, drywall and electrical work will continue.
- In the common areas opposite the elevator, and the “game nooks”, case work and installation of cabinets will begin

### **Levels 4-5:**

- Overhead corridor work continues with patching and painting.

### **DURING THE WEEK:**

- Outside noise will continue this week due to demolition work at the end of the north wing.
- Concrete pouring will continue this week for the shear walls and footings in the basement level as part of the seismic upgrade.
