COVID-19 Update

Dear Bayview Community,

We are pleased to share that the second round of COVID-19 testing of the staff members who were suspected of exposure have **yielded all negative results**. The staff member who tested positive remains in quarantine and continues to recover following the guidance of the Department of Health and physician care.

We appreciate your understanding in the temporary roll back of the opening of our food court, programming and activities, visitation, beauty salon, and the use of the fitness center and pool through Thursday, October 22nd. This timeframe allows a full incubation cycle of the virus to be completed. If there are no new symptomatic cases or other suspected COVID-19 cases, we will resume all activities stated above on Friday, October 23. We will update you as we continue to move forward with this timeline.

As mentioned in our last memo, this is a crucial reminder that we should not become complacent. Thank you for your unending commitment in the consistent and proper use of face masks, maintaining social distancing, and practicing excellent hand hygiene. We remain inspired by the strength and resilience this community exhibits each day.

Sincerely,

Joel Smith, Health Services Administrator
Office: 206.281.5747 | jsmith@bayviewseattle.org
