A POINT OF VIEW

01/25/21

## COVID-19 Updates

### Surface testing:

We received the latest surface testing results and we are pleased to report that all results have come back **negative**. These include all designated zones as well as all individual 6<sup>th</sup> floor resident apartments. Thank you once again to all residents who were proactive in this collective effort. It is clear our sanitation efforts have paid off. We will continue routine surface testing and will keep you updated as new information is provided.

### Vaccinations:

As of this writing, vaccinations are still underway for all residents and staff. So far, the vaccine clinics throughout the building have been running very smoothly and efficiently. We are profoundly grateful to all those involved in making this moment one for Bayview's history books. Thank you for trusting us with your care. We will be sending out more information outlining the next steps for those needing their booster shot in upcoming memos.

Let us all hold onto this moment of hope as we look into the coming weeks and months. Please continue to remain vigilant in infection control procedures such as proper use of facemask at all times, hand washing, and 6 feet social distancing.

Sincerely,

Joel G. Smith  
Health Services Administrator
