MEMO

COVID-19 Updates

The Leadership Team became aware on July 6th, 2021 of two staff members that tested positive with COVID-19. Here is what we know:

- Two employees on administrative (A) level tested positive for COVID-19. Due to employee confidentiality, we are unable to reveal vaccine status.
- We have determined that no residents have been exposed.
- The Department of Health has been notified of our status.
- Contract tracing is being conducted and any employees with potential exposure have been identified, contacted, and tested. We will inform you when we receive the results.
- Bayview is now considered in outbreak status.
- Increased sanitation efforts have been reinstated throughout A- level as an extra precaution.

As a reminder, if you still need vaccination, please contact Janice Pate – RN at x3354 to schedule your vaccination.

In a previous memo, we were anticipating further liberalization of our policies. However, due to the current outbreak status, we are required to wait for updated guidance from DOH before we continue on the path of loosening restrictions. Bayview will continue to be in an outbreak status for the next 28-days, or longer depending upon potential future positive results. For residents in and staff, this means we are in a holding pattern until DOH comes back with further guidance.

We appreciate your support throughout this long journey and we fully share in your frustration. Through our collective experience of the past nearly 17 months, there is no way we can fully express our gratitude for the continued vigilance. We will follow up with more information soon.

Sincerely,

Joel G. Smith, Health Services Administrator
